For new U.S. head, a delicate balancing act

PHILADELPHIA, Pa. — The U.S. economy is expected to grow at a rate of 2.5% in 2013, according to the latest forecast from the U.S. Department of Commerce. This is a significant improvement from the 1.5% growth rate in 2012, which was the lowest since the Great Depression. The U.S. economy is expected to lead the world in growth in 2013, with other major economies like China and India following closely behind.

The first time I saw a person with a prosthetic arm, I was struck by the way they moved. It wasn't just the mechanical parts, but the way they integrated them into their lives. I realized that the real challenge wasn't just creating a device, but helping someone adapt to it. That's why I started this company. We focus on designing prosthetics that are not just functional, but also comfortable and easy to use. We work closely with our users to ensure that our products meet their needs and improve their quality of life. It's a journey of discovery and innovation, and we're excited to see where it leads us next.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.
